

Biology Final Review

Name _____
 Class Number _____
 Class Period _____

Across

- 2 The interaction of 2 different organisms living together where at least 1 benefits.
- 3 A general term used to describe chemicals produced that cause damage to air, water, land, etc.
- 5 This is another term for "transfer" when referring to the carbon cycle.
- 8 Contamination of water bodies as pollutants enter the water supply.
- 9 In this relationship, one organism benefits and one is harmed (usually death).
- 10 In this type of relationship, one organism benefits and one is harmed (AKA The "Host").
- 13 When one organism benefits and one is unaffected is known as this type of relationship.
- 14 Of or relating to feeding or nutrition
- 16 An organism that obtains food by consuming other organisms (AKA Heterotroph)
- 17 An organism that makes its own food (AKA Producer)
- 18 A species that is introduced to an area and is non-native.
- 20 The clearing of normal forests so the land can be used for non-forest reasons.
- 21 Excessive amounts of artificial light that brightens the night sky over inhabited areas.
- 23 The movement or cycling of this element is necessary for all living things.

Down

- 1 Carbon Dioxide and Water are known as _____ in a Photosynthesis Chemical Formula.
- 2 Examples of these organisms include: Vultures, Raccoons, Crows and Hyena
- 4 Non-Living or Inorganic
- 6 Method of waste disposal.
- 7 The burning of fossil fuels is known as _____.
- 10 This process makes the food
- 11 The energy pathway starts with this
- 12 An organism that breaks down the wastes or remains of other organisms.
- 15 Precipitation that collects chemicals and pollutants from the air.
- 19 Living or Organic
- 22 Movement creates this type of energy
